REPORT:

On 2/28/17 at 1623, Contra Costa Health Services Hazardous Materials Programs (CCHS HMP) Incident Response Team (IRT) received a notification from Contra Costa County Sheriff and at 1627 from Contra Costa County Fire (Con Fire) of a hazardous condition at 4450 Melody Drive in Concord. Hazardous Materials Specialist (HMS) S. Dwight followed up with Con Fire Captain Kelly who had responded to the scene. Capt. Kelly stated that 3-4 gallons of pool chemicals (muriatic acid and chlorine), some empty and some full, had spilled onto the roadway. No cloud or vapors were present at that time.

HMS Duazo, Tougeron, and Abramians responded directly to the scene in privately owned vehicles. HM1 departed the Bay at 1648 with HMS Dwight and Pham. CCHS HMP IRT initially arrived on scene at 1647. HM1 arrived on scene at 1717. HM4 departed the Bay at 1711 with HMS Williams and Dempsey and arrived on scene at 1750 with decon equipment and additional materials for packaging/disposal.

CCHS HMP IRT observed one gallon containers of pool chemicals (muriatic acid and sodium hypochlorite) in the gutter of Melody Drive. 4 1-gallon containers of muriatic acid and 3 1-gallon containers of sodium hypochlorite were intact and were removed from the scene. Approximately 1 1-gallon container of muriatic acid and 1 1-gallon container of sodium hypochlorite had released and mixed in the gutter, and 1 1-gallon container of sodium hypochlorite had released approximately 200 feet north on Melody Dr.

CCHS HMP IRT secured the area, prepared a site safety plan, and conducted a pre-entry briefing. HMS Tougeron and Duazo donned Level C PPE, neutralized the spilled chemicals, and removed the spill residue using absorbent pads. CCHS HMP IRT then rinsed the area with water using a Hudson sprayer and checked the pH to ensure it was neutral. HMS Abramians segregated the intact containers for disposal. Air monitoring was conducted using chlorine gas badges during the mitigation activities.

Cleanup and response activities were completed at approximately 1830. HM4 returned to Bay at 1850. HMS Dwight contacted Cal OES to file spill report 17-1783 and the California Department of Toxic Substances Control (DTSC) Duty Officer to request ERER number 2017-02-02 to obtain DTSC funding for disposal of waste generated from cleanup activities. HM1 returned to Bay at 2003. DTSC's contractor disposed of the waste on 3/2/17.

Additional Required Items: Bill of Lading, Request for Invoice, and Site Safety Plan

Report Prepared by: S. Dwight
