REPORT:

At 15:26 on 4/9/2022, Contra Costa Health Hazardous Materials Programs Incident Response Team (Response Team) was called by the Solano County Environmental Health Department to inform us that equipment near the Valero Refinery coke silos caught fire. The equipment fire was out, but the pier was burning and the fire smoke was impacting air quality in Contra Costa County.

To assess the potential health impacts of the fire smoke to the residents of Contra Costa County, XB dispatched 4 members (NU, JP, AS, FZ) to air monitor and to collect air particulate samples to determine if a Contra Costa Health Services (CCHS) response was necessary.

Based on the visible smoke observed impacting central Contra Costa County, a Health Advisory was issued by CCHS for Clyde, North Concord, and Bay Point. The Incident Response Team monitored air quality conditions with DustTraks from 16:00 to 19:00. Air monitoring was conducted visually and/or DustTraks in central Contra Costa (Martinez, Clyde, Cocord, Bay Point, Walnut Creek, Pleasant Hill, Clayton, and Richmond. Air monitoring results indicated that the Health Advisory was adequate CCHS response. Shelter-in-Place was not required.

Health Advisroy was lifted at 07:30 on 4/10/2022. The fire was reported to has been extinguished in the early afternoon the same day.

Additional Required Items: Bill of Lading, Request for Invoice, and Site Safety Plan
